

COMPANY PROFILE

Version 03.2025

Assembly Technology for Smart Devices

XENON is a leading German manufacturer of assembly and inspection lines for the automated production of mechatronic components. As an independent system integrator, XENON supplies turnkey high-tech production lines worldwide.

For more than 35 years, the owner-managed group headquartered in Dresden, Germany, with plants in China and Mexico, has been offering tailor-made automation solutions from project application to manufacturing and installation up to after-sales service.

Industries
